Bop Till You Drop

lemon slice or yellow ripe banana
there is something bright up in the sky
sparkling lights, like freckles on a child's face
I see millions of stars way up high
come with me, tonight I feel like dancing
I've been struck by the moon, I wanna be with you
it sounds crazy but it is true
and here's what I want you to do:

bop till you drop
it's a long hot summer-night
shake till you break
I'll come to your rescue
bop till you drop
everybody's catching the groove
I get hot when watch you move
bop till you drop
it's a long hot summer-night
shake till you break
I'll come to your rescue
bop till you drop
everybody's catching the groove
I get hot when I watch you move

he who said the night's been made for sleeping
doesn't know how to have a good time
boogie down as if there's no tomorrow
you can take it from me, you'll be fine
hold me close and kiss me in the starlight
make me float in the air just like a big balloon
say you love me and do it soon
under the bright banana moon

bop till you drop
it's a long hot summer-night
shake till you break
I'll come to your rescue
bop till you drop
everybody's catching the groove
I get hot when I watch you move
.....

and when the sun starts to rise
the stars all fall in your eyes

chorus
